Arsenii Polenok

Data Engineer | Python, GCP & BigQuery

Data Engineer with 5+ years of experience building and operating production data platforms, ETL/ELT pipelines, and analytical warehouses using Python, SQL, GCP, BigQuery, Airflow, ClickHouse, PostgreSQL, and PySpark.

Experienced with terabyte-scale workflows, data quality, incident resolution, external API integrations, warehouse optimisation, and client-facing delivery.

With my background in dynamic, remote start-up environments, I'm used to taking ownership of outcomes end to end and balancing high engineering standards with shipping quickly.

WORK EXPERIENCE

Yandex Cloud (Data Engineer)

2025 – Present

- Built and operated multi-stage production data pipelines across 8+ business domains, processing terabyte-scale data;
- Migrated several of the largest production pipelines to PySpark for large-scale distributed data processing;
- Led migration of a core data model involving 100+ dependent processes, improving performance and reducing operational complexity;
- Designed and maintained Data Quality monitoring and validation across production workflows;
- Owned end-to-end incident resolution, including detection, root-cause analysis, stakeholder communication, and permanent fixes;
- Continuously optimized workflow performance and resource utilization;
- Collaborated with engineering teams through technical troubleshooting and PR reviews, supporting engineering quality and maintainability.

LATOKEN (Data Solutions Engineer)

2023 – 2025

- Maintained and optimized Airflow ETL pipelines processing more than 1 TB of production data per day;
- Developed ingestion pipelines combining on-chain and off-chain data for 17k+ tokens across 30+ blockchain networks, increasing data coverage by 3x;
- Redesigned DWH architecture together with 5 cross-functional teams to improve scalability and query-processing performance;
- Processed a 3 TB trading dataset using partitioned computation for Trading Desk PnL and analytical workloads;
- Built 10+ automated Power BI dashboards for operational monitoring, reconciliation, and business stakeholders;
- Translated loosely defined requirements into reliable production data solutions.

CloudReports (Backend Developer)

2021 – 2023

- Developed ETL/ELT integrations for 15+ third-party ERP, CRM, and marketplace APIs, delivering data into BigQuery and ClickHouse;
- Supported 420+ production integrations, handling pagination, rate limits, partial failures, late or restated data, and inconsistent vendor documentation;
- Developed a reusable Python package that reduced development time for new integrations by 75%;
- Created SQL views and data models to normalize integrated data for downstream analytics;
- Optimized data export and processing logic, reducing Google Cloud resource costs by more than 5x;
- Worked directly with clients and external data providers to translate inconsistent source systems and business requirements into reliable integration solutions.

SKILLS

Areas of Expertise

- Data Engineering: ETL/ELT, DWH design, batch/distributed processing, workflow orchestration
- GCP Data Platforms: BigQuery, production pipelines, performance and cost optimisation
- Data Reliability: Data Quality, monitoring, incident resolution, production troubleshooting

Programming Languages

Python (advanced), **SQL** (advanced), C# (intermediate), Go, R

Data Processing & Orchestration

Apache Spark, PySpark, Apache Airflow, Prefect, Pandas, NumPy

Google Cloud Platform (GCP)

BigQuery, Cloud Storage, Workflows, Cloud Run, Cloud Tasks, Firestore, Cloud Logging / Monitoring, Pub/Sub

Databases & Warehouses

BigQuery, ClickHouse, PostgreSQL, MySQL, MS SQL, Redis, YTSaurus

Platforms & Engineering Tools

Docker, Kubernetes, Linux (Ubuntu), Git, CI/CD

Technologies & Concepts

REST APIs, Distributed Systems, Data Quality, ETL/ELT, DWH, GCP Data Platforms, Production Operations

English: C1 Advanced

Remote-first experience

EDUCATION

Financial University (BS)

Applied Maths and Computer Science

Data Analysis and Decision Making in Economics and Finance

Moscow *2018 – 2022*
